-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1761

Applicant's arguments with respect to claims 1-9 have been considered but are moot in view of the new ground(s) of rejection.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bernhardt (EP 0236288) in view of Rule (US Patent No. 4419378), Babayan (US Patent No. 4093750), and Talkington et al (US Patent No. 4960602).

Bernhardt discloses the use of polyglycerol fatty acid esters and sugar fatty acid polyesters in dairy products including milk (see entire document, especially page 14, lines 3-12). Bernhardt also discloses that esterification can be done by any method known in the art that requires the desired rheological properties (see page 12, lines 21-26).

The claims differ as to the recitation of a specific cloud point.

Rule (US Patent No. 4419378) discloses a milk-containing beverage comprising polyglycerol esters of fatty acids (see entire patent). Rule also discloses the manipulation of the esterification to obtain the desired product (see column 4, lines 3-45).

Babayan (US Patent No. 4093750) disclose beverages containing a polyglycerol ester of a fatty acid (see entire document).

Art Unit: 1761

Talkington et al (US Patent No. 4960602) disclose the use of sucrose fatty acid esters in foods and beverages.

The specific cloud point is no more than obvious to that of the prior art. In the absence of a showing to the contrary the manipulation of the cloud point is well-within the skill of the art and merely dictated by the desired final product.

It would have been obvious to a person of ordinary skill in the art, at the time the invention was made, to manipulate polyglycerol fatty acid esters as taught by Rule (US Patent No. 4419378), Babayan (US Patent No. 4093750), and Talkington et al (US Patent No. 4960602) in the milk product of Bernhardt because the use and manipulation of polyglycerol fatty acid esters in milk products is conventional in the art.

It is noted that once the art has recognized the use of a component such as polyglycerol fatty acid esters in foods and beverages the use and manipulation in specific foods and beverages would be no more than obvious and expected to one of ordinary skill in the art.

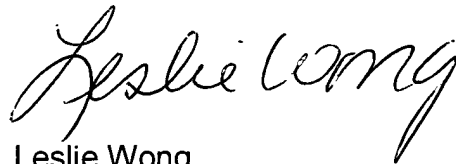

Sekula et al (US Patent No. 6235335) and Takahashi et al (US Patent No. 5882708) are cited as of interest.
